Photography: Identifying Line, Shape, Form; Foreground, Midground, and Background

Directions:
View each photo. Using a marker, trace/highlight and indicate the following:

- Subject/Focal Point(s)
- Foreground object of interest/importance (if present)
- Midground object of interest/importance (if present)
- Background object of interest/importance (if present)
- Prominent Vertical & Horizontal Lines
- Prominent Leading Lines Curved Lines/Form
Words of Wisdom from the Photographer...

• The beauty of photography is that everyone sees the world slightly differently. Remember to use line, shape, and form, and then customize these elements to what works best for you.

• Photography takes practice and patience — the rewards are unique and personalized images, and the underlying goal is to have fun and learn from the experience.
