

Northwoods ECQuIP (Engaged Community Quality Improvement Project) is a project at Headwater's Inc. We aim to help families access autism services.

We are funded through an agreement with the University of Wisconsin - Madison. The state project is funded by the Health Resources & Services Administration.

Are you Concerned about Autism?

Headwaters Inc.

Autism: Should I Be Worried?

Autism is a brain-based condition that affects children's growth. It causes delays in language and social skills. These affect a child's lifelong outcome.

Autism can be identified in children as young as 15 months. However, many children are not identified as having autism until much, much later. This affects the potential of these children to get early services that help them grow and gain skills.

Family Navigation

A family navigator guides a family through the healthcare system.

Family navigation decreases healthcare barriers. It also improves access to healthcare for families.

Autism Family Navigation

Our Northwoods ECQuIP autism family navigators are here to help. They are experienced professionals who know about services in the Northwood's. They will help you get access to those services. They are also members of our community. They know the strengths and challenges facing Northwood's families.

Autism Family Navigation Services through Northwoods ECQuIP are provided at no cost to you. We serve Forest, Vilas and Oneida Counties.

Family Navigation Services

Our services may include:

- Listening to your concerns
 - Answering questions about autism
 - Helping you access autism screening for your child
 - Helping you access autism diagnosis for your child
 - Assisting you in getting services for your child and family
 - Connecting you to other families who have also experienced autism
- Contact us today to find out more!
